## PRESS RELEASE

# Chiropractic Future Announces 2025 Student Travel Stipend Recipients for ACCRAC Conference

### **Celebrating Academic Excellence and Advancing Chiropractic Research**

Molalla, OR – January 21, 2025 – Chiropractic Future is proud to announce the recipients of the 2025 Student Travel Stipends for the upcoming ACCRAC Conference, which will take place from March 20-22, 2025, in New Orleans, Louisiana. This initiative is part of Chiropractic Future's ongoing commitment to empowering the next generation of chiropractic professionals and promoting groundbreaking research in the field.

### **A Platform for Future Chiropractic Leaders**

The 2025 ACCRAC Conference will provide an unparalleled opportunity for these exceptional students to present their faculty-mentored research, network with leading professionals, and engage in discussions about the future of chiropractic care. Set against the vibrant backdrop of New Orleans, the conference will bring together global thought leaders and innovators in the chiropractic profession. For the stipend recipients, this event represents more than academic recognition—it's a chance to contribute to advancing chiropractic care through their passion and research.

### **Empowering Students Through Support**

Chiropractic Future's Student Travel Stipends will cover conference registration, travel and lodging expenses for the selected students, ensuring they can focus on their academic and professional development without financial constraints. By minimizing these barriers, Chiropractic Future fosters the growth of students who will shape the future of the chiropractic profession.

"We are excited to support these talented students and provide them with the resources to present their research at such a prestigious event," said Dr. Cyndy Long. "The future of chiropractic hinges on our ability to nurture our students and young professionals on the importance of research production, dissemination and implementation. The Student Travel Stipends for students to engage, learn, and contribute their faculty-mentored research at a scientific conference is just one way we are working to advance the profession."
